Cup'ik/Yup'ik Keyboard Layout

Notes

- All accents are typed after the base character: **ń** is typed **n** then **slash**.
- To type the acute accent ´ use the **Slash key /**. **ḿ** is typed **m** then **Slash**.
- To type the ligature accent ̂ use the **Semicolon key ;**. **u͡g** is typed **u** then **Semicolon** then **g**.
- All changed keys can type their original value by holding down the **Right-Alt** or **Option key**. The *Semicolon ;* is typed **Right-Alt+Semicolon** (Windows) **Option+Semicolon** (Mac).
- Opening and closing quotes. For Mac users, **Right-Alt** is either of the **Option** Keys.
    - ▷ single: ' Grave — ' Apostrophe
    - ▷ double: " Shift+Left Bracket — " Shift+Right Bracket
    - ▷ single ‹ Right-Alt+Shift+9 — › Right-Alt+Shift+0
    - ▷ double « Right-Alt+9 — » Right-Alt+0

* The closing quote character **'** is, in Yup'ik/Cup'ik, a letter of the alphabet. For this reason, punctuation 'single quotes' should not be used in this language. "Double quotes" might also lead to confusion. It is suggested that different quotation punctuation be used.
